

Hello!

I'm an experienced developer searching for an opportunity to take my skills and knowledge to the next level, allowing me to further grow professionally and my clients to fulfill their dreams.

Being a curious and investigative mind, a goal-oriented problem solver not shy of complexity, having almost two decades of extremely versatile, successful and productive development experience, I'm fluent with many of the modern technologies, such as Python (Flask, Django), Go, JavaScript (Angular/TypeScript/Vue/React), Java, PostgreSQL.

Some of my interests include NLP, Deep Learning, Agent Systems, Robotics, Mathematical Modeling, Identity Management, Bioinformatics, Biology.

If you'll find my experience somewhat relevant to your company's needs, please reach me back.
